

hint to sufferers will be both seasonable and acceptable just now. The greatest possible relief may be speedily obtained by soaking the feet for a few minutes in either tepid or cold water, to which a little Condyl's Fluid has been added. Baron Liebig, the eminent scientific chemist, and the celebrated Dr. Tanner, in his work, "The Practice of Medicine," strongly recommend Condyl's Fluid to those who suffer from "tender, aching, burning, or perspiring feet." These well-known sanitary authorities say that a dessertspoonful of Condyl's fluid should be added to every gallon of water. Its use in a sponge or entire bath largely increases the healthful and invigorating effects. Condyl's Fluid is universally known as a reliable disinfectant, used and recommended by all prominent medical practitioners, and the pamphlet, issued with every bottle of Condyl's Fluid, quotes directions for almost innumerable uses by many of the most eminent in the profession. We feel that there is little left for us to say as regards this preparation; so long has it been known, tested, and its use recommended by those most prominent in the medical profession, that any disinfectant associated with such names as we note on their pamphlet, needs no further commendation at our hands. Yet, since the season is such when disinfectants are

always more or less in demand, we would remind our readers that Condyl's Fluid is quite as carefully prepared and "put up" as ever, and that for all cases (infectious ones in particular) it will especially recommend itself on account of its absolute freedom from smell. Yet while its use will be found so serviceable in the sick room, it can as advantageously be employed in our everyday toilet; and those suffering from tender feet will find no quicker relief than by bathing them in water to which a little fluid has been added. But perhaps Condyl's Powder will be considered the most valuable by many of our readers on account of its portability; for although in a suspended state it possesses the same power as the fluid for disinfecting, purifying, deodorising and antiseptic purposes, yet it comes immediately soluble in water, and so can be used in place of the fluid. Still further we would mention Condyl's "Remedial Fluid," that has found such universal favour in the profession, its use being invaluable in cases of abscess, ulcers, scarlet fever, sore throats, burns, &c.; and for a mouth-wash and for all toilet purposes the use of Condyl's "Ozonised Water" will be found very refreshing. We cannot speak too highly of all the preparations put up by Messrs. Condyl and Mitchell (Limited), Turnmill Street, London, E.C.

CYCLING
FOR THE
MAIMED.

80 Miles a day
WEARING AN
ARTIFICIAL LEG.

The ARTIFICIAL ARMS, with HANDS and LEGS, with side, as well as backward and forward ankle movements, made *only* by

J. & E. FERRIS,

48, Great Russell St., LONDON, W.C.,

Are acknowledged by WEARERS & the MEDICAL PROFESSION to be the **Best** the **Safest** and the most **Durable** Limbs in

THE WORLD.

They are the *only* Artificial Limbs with which the health-giving pleasure of **CYCLING** can be enjoyed.

Illustrated Pamphlets, with numerous testimonials and opinions of the Press, confirmatory of the above, forwarded Free on application.

Apply as above

A CONCENTRATED
— **RAW FOOD.**

Most Nourishing and Strengthening.

Indispensable for Invalids and Sick Room.

The *Lancet*, October, 1891, says: "Our analysis and examination of this admirable preparation show the extraordinary degree of concentration that has been attained by a process which can only be regarded as phenomenal, since the retention of the beef-juices in the raw and un-cooked state has also been secured. The total solid matter amounted to 22.22 per cent. of which 1.25 was mineral constituent (phosphate), 16.90 albuminous matter (2.68 nitrogen), and 4.07 other organic principles. Despite the excellent condition of the sample submitted to us, no objectionable preservatives could be found."

Of all Chemists, &c., in 2oz., 6oz., and 12oz. bottles, price 1s. 3d.; 3s.; and 5s. respectively.
