
Disinfection by Nurses.

“SANITAS FLUID”

Is the best Disinfectant for use in Dressing Wounds, Spraying about rooms in sick cases, wetting sheets, and cold sponging in cases of Fevers. No other disinfectant should be employed in cases of Confinement.

“SANITAS OIL”

Should be used for Fumigating Sick Rooms, and for Inhaling in all cases of Lung and Throat affections. In cases of Diphtheria the throat should be sponged with it by means of an atomiser.

NEW EXPERIMENTS,

which have recently been made by Dr. A. B. Griffiths, prove that

“Sanitas Fluid” and “Sanitas Oil” easily kill the disease germs of Consumption, Scarlet Fever, Typhoid, Diphtheria, Glanders, and Cholera.

The Sanitas Disinfectants and Appliances are far the Best for General Use.

Copies of Dr. Griffiths's Pamphlet, and “Plain Directions How to Prevent the Spread of Diseases,” will be sent free on application to

The Sanitas Co., Ltd., Bethnal Green, London, E.
