

# Used & Recommended by High Authorities.

NONE GENUINE UNLESS BEARING THE TRADE MARK.

## SOLUTION.

### D.

For General Disinfecting  
Purposes.

PERFECT DEODORIZER.  
NON-POISONOUS.  
NON-CORROSIVE.  
DOES NOT STAIN.

Sold Everywhere.  
1s. per bottle.  
(Champagne Quarts.)

PROTECTED BY ROYAL LETTERS PATENT.

SOLE AGENTS FOR UNITED KINGDOM:—

**THOMAS HODGKINSON, PRESTONS AND KING,**  
81, BISHOPSGATE STREET WITHOUT, E.C.

## SOLUTION "D"

The Surveyor to one of the largest London Vestries writes, 26th January, 1893: "I have tested the qualities of the 'Aminol' Disinfectant, and find the results to be satisfactory. It is a thorough Disinfectant, *killing* and subduing all putrid and bad smells, and not merely hiding them, as is the case with many other disinfectants. I consider that, when its usefulness becomes known, it will be very much used."

## SOLUTION "R"

This solution is in itself a perfectly harmless fluid as regards the human organism; therefore, when applied to wounds, no undesirable disturbances could ensue owing to its being absorbed; this is well known to be the case with some antiseptics—as in carbolic acid applications, or in the use of perchloride of mercury. Its function is that of a germicide, and, being applicable both externally and internally, as a Dressing, Lotion, Mixture, Gargle, Spray, or Injection, it is invaluable in all diseases caused by germs, *and, the seat of which is accessible to the remedy.* It has now been sufficiently tested by a large number of physicians and surgeons of standing (in various diseases of the skin and the mucous tract) to place its importance and its therapeutical value beyond doubt.

Pamphlets, &c., on Application.

ORIGINALS OF ALL TESTIMONIALS CAN BE SEEN AT THE OFFICE OF

**THE "AMINES" SYNDICATE, LTD.,** 101, Leadenhall Street, E.C.
