REPLIES TO CORRESPONDENTS.

"Nest," Eastbourne.—You must send name before we can reply.

Sister White, Knightley, Exeter.—The votes we invited were for Miss Henrietta Stewart, R.R.C., for a pension in connection with the Royal Hospital for Incurables at Putney. If your votes are not disposed of, would you communicate with her at Oakbank Villa, Oban, N.E.

Miss Ormerod, London.—Order the "Nursing Directory," price 5s., from the NURSING RECORD Office, 11, Adam Street, Strand; in it you will find the information concerning all the Training Schools of repute.

Miss Gowers, Brighton.—Apply personally at 12, Sussex Square. The Home is now full. You must make arrangements beforehand, as many applications are received during the summer months.

Miss Bowers, Birmingham.—We regret we cannot recommend you to join the Society you mention.

The address of Queen Victoria's Jubilee Institute, Scottish Branch, is 29, Castle Terrace, Edinburgh, not 2, Lansdown Crescent, as was stated by mistake a fortnight ago.

Miss Griffiths, Aberystwith.—The physician you mention is a very eminent man, but we never recommend individual practitioners. Your own medical man is the proper authority for you to go to. He will direct you as to the specialist most suitable for your case. Thanks for your kind expressions of regard.

Mr. A. Mostyn.—We are glad you are so anxious to help in the return of Women Guardians for your parish. If you were to communicate with the Secretary of the Society for

Promoting the return of Women as Poor Law Guardians, at 4, the Sanctuary, Westminster, S.W., she would give you all information. We may remark, in passing, that this Association is ready and willing to receive donations from those who wish to encourage the election of Women Guardians, who invariably do their work well and inaugurate most beneficial reforms.

Important to Mothers and Nurses to use Feeding Bottles and Comforters Fitted with

KENNEDY'S Sanitary Improved Patent Fittings

MEDICAL OPINIONS.

The "Lancet" says: "Sanitary Shields for Babies' Feeding Bottles, &c., is a discovery of highly-glazed Kaolin Porcelain, designed to replace the familiar bone shields. The bone shields, even when of good quality, soon become roughened and porous, and are liable to absorb saliva and milk—drawbacks from which the sanitary shields are entirely free. In the artificial feeding of infants thorough cleanliness is indispensable, on which ground the utility of this advice is at once apparent."

We have over a Thousand Testimonials from Mothers. They say it is a blessed invention for their charming babies.
