We are pleased to hear that Miss Watkins, acting Lady Superintendent of the English Hospital at Cairo, is working earnestly for the Society, and is interesting her colleagues in the importance of the movement. We hope soon to have quite a good number of members in Cairo.

We have received the following enthusiastic letter from a Nursing Sister in South Africa. How we wish hundreds more nurses were inspired with her admirable spirit!

"By the *very first possible post* from this distant spot, I have much pleasure in sending my application for membership to the new Society, and wish it every possible success. I hail with gladness every step which brings us nearer State Registration. I shall look forward, and follow with keen interest, the progress of the Society through the pages of the NURSING RECORD, which comes to cheer me every week regularly. If I can be of even the smallest use out here to further the interests of the Society, it would give me the greatest pleasure. I will do my little best, if you will let me know how! I will certainly make it known amongst our own small band of Sisters."
