### "Practical Points" Competition.

We desire to draw the attention to the Prize Competition, of which the conditions are published on the last page of this issue. We hope that many of our readers will enter for this competition, for there must be many acquainted with methods of practical nursing detail which are practised in their own training school, which they have evolved for themselves, or with which they have become acquainted. We hope they will describe these methods.

Illustrations are not compulsory, but add greatly to the interest of such "points."
