LEWIS'S DIET CHARTS.

A suggestive set of Diet Tables for the use of Physicians, for handing to Patients after consultation, modified to suit individual requirements. For Albuminuria—Alcoholism—Anæmia and Debility—Constipation—Diabetes—Diarrhæa—Dyspepsia—Fever—Gout—Nervous Diseases—Obesity—Phthisis—Rheumatism (Chronic). With Blank Chart for other Diseases. The proper regulation of diet as a means of cure plays a most important part in all diseased states; the Practitioner, however, has not often the time at the moment of consultation to write out full directions, which each patient is naturally anxious to have, as to the articles of food which should be taken or avoided. To meet this need these charts have been compiled by a Physician from the most authoritative sources and embody what are considered the best forms of diet for each disease. A sample Chart will be sent on receipt of a penny stamp. London, H. K. LEWIS, 136, Gower Street, W.C.
