					8 6

Extract from “THE LANCET.”

“Of all the pocket companions now essential to the practitioner, none is more indispensable than a good Thermometer. It is a gratifying circumstance to find instrument makers taking pains to make the instrument more useful by making it more reliable and more easy of use. The Messrs. ARNOLD & SONS have attempted to make the scale more legible by colouring it red and indelibly, and the attempt has been successful. The instruments also have been carefully tested as to accuracy.”

Every Clinical Thermometer manufactured by ARNOLD & SONS is tested by their new Apparatus, which has the Kew verification for ascertaining and confirming the correctness of these Instruments.

NOTICE—The greatest care is taken in packing these delicate instruments; from their fragile nature they are easily broken; therefore it must be distinctly understood we do not hold ourselves in any way responsible for damage sustained in transit.

These Thermometers are so accurately constructed that Kew Certificates are quite unnecessary.
