## If germs were as big as flies...

every mother would realise the necessity of sterilising feeding bottles. To do this by boiling water is an extra difficulty for women who are probably already rushed off their feet. The beauty of the Milton Feeding Bottle Routine is that it is absolutely effective in killing germs yet so very simple that the busiest woman can carry it out without extra strain.

"One of the greatest advances has been the use of Milton in the sterilisation of the feeding bottles and teats. In those hospitals which have adopted the Milton technique, Gastro Enteritis has entirely disappeared. No more broken and cracked bottles from steam sterilisation. What a simple, yet absolutely efficient method."

Extract from opening address at the Professional Nurses and Midwives Conference and Exhibition on Monday 17th October 1949.

# Milton

For full particulars write to the Chief Bacteriologist, Milton Antiseptic Limited, John Milton House, London N.7
