Final examination for second section of graduating class, both oral and written.

The Principle of Registration.

THE following interview with a Nurse desirous of joining the Registered Nurses' Society is sufficiently typical and important to deserve publication. Superintendent seated at desk, with pen and note book.

Enter Nurse.

NURSE: I am thinking of taking up private Nursing.

SUPT.: Yes. Are you a Registered Nurse?

NURSE: Oh, no! but I am eligible, but I do not intend to register unless I can be taken on the Registered Nurses' Society.

SUPT.: Indeed! I fear you have not grasped the significance of the principle of Registration of Trained Nurses.
