REPLIES TO CORRESPONDENTS.

*A Perplexed Subscriber, London.*—Obtain last week's NURSING RECORD, in it you will find the names in full to which exception has been taken, owing to thirteen Nurses having been selected from Middlesex Hospital, and five from the Chelsea Infirmary, leaving only twelve vacancies for other British Hospitals. It is an unjust list, and should therefore be declined by those members of the Royal British Nurses' Association who value liberty of conscience and speech.

*Miss Helen G. Mosse, High Barnet.*—Forward the M.S. to Editor, 20, Upper Wimpole Street. We will express an opinion.

*Miss Brown.*—For the Sick Nursing Classes to which you refer, apply to the Secretary, Toynbee Hall, Whitechapel. E. We are not sure whether they are held in the Summer, but he will give you full particulars.

*Miss A. Godwin, Liverpool.*—Obtain the "Nursing Directory," price 5s., from the Manager, NURSING RECORD Office, 11, Adam Street, Strand. It is a most useful book of reference for those intending to enter a Hospital for training. We fear you are too young to gain admission in a large General Hospital—the age is usually from 23 to 35, but you could enter a Children's Hospital for a couple of years; the experience gained is most useful.

## KENNEDY'S Sanitary Improved Patent Feedings

MEDICAL OPINIONS.

The "Lancet" says: "Sanitary Shields for Babies' Feeding Bottles, &c., is a discovery of highly-glazed Kaolin Porcelain, designed to replace the familiar bone shields. The bone shields, even when of good quality, soon become roughened and porous, and are liable to absorb saliva and milk—drawbacks from which the sanitary shields are entirely free. In the artificial feeding of infants thorough cleanliness is indispensable, on which ground the utility of this advice is at once apparent."

We have over a Thousand Testimonials from Mothers. They say it is a blessed invention for their charming babies.
