THE PASSING BELL.

It is with very great regret that we record the death of a notable pioneer worker in the nursing profession, Sister Henrietta of Kimberley, to whom nurses in South Africa largely owe the honourable distinction of being the first to be registered by Act of Parliament in any country.

Sister Henrietta, who was a daughter of the late Rev. Henry Stockdale, Rector of Clayworth, Nottinghamshire, died on October 5th at Kim-

berley, at the age of 64.

It was in 1891, when the Medical and Pharmacy Act was passed in Cape Colony, that incorporated in it was a section providing that "the Council may, in accordance with Regulations approved by the Governor, grant certificates of competence as Trained Nurses . . . to any person who shall satisfy the examiners thereto appointed by the Council, of his or her competence, skill, and fitness in and for the occupation of nursing, and who shall in addition produce proof by certificate or otherwise of having had sufficient training in nursing work, under competent supervision. Every such certificate shall be . . entered in a register to be kept for that purpose in connection with, and a part of the register provided for in this Act."

To have accomplished this is a great achievement to Sister Henrietta's credit, but her work was many sided, and, in the South African war, she took a prominent part during the siege of Kimberley and after in organising the nursing of the

sick and wounded.

Full of good deeds for the betterment of humanity she has passed to the life beyond.

We also regret to record the death of Dr. Joseph Bell, Consulting Surgeon to the Royal Infirmary, Edinburgh, well known to and beloved by many nurses, with whom he was brought in contact both by his position at the Infirmary and his connection with the Council of the Scottish Branch of Queen Victoria's Jubilee Institute. Like many of his compeers Dr. Bell was remarkable for his shrewd and kindly nature, and great powers of observation.

Dr. Bell will be greatly missed in both medical and nursing circles, for he had a magnetic and

charming personality.

THE WOMAN'S PLATFORM.

We hope every one of our readers has during the past week seen the *Standard* newspaper, and as they cannot fail to be intensely interested in the columns headed "The Woman's Platform," have substituted it for the anti-women papers they have previously paid for. The *Standard* is the first London daily to give space for free discussion on the Woman's Movement, and one good turn deserves another. What a relief to know that for the future great national questions like the State Registration of Nurses cannot be "damped down" by social influence and vested interests. Send your articles and news to the *Standard*.
