

IMPORTANT ITEMS TO NOTE AND REMEMBER.

MESSRS. E. & R. GARROULD.

There is no more popular establishment with nurses than Messrs. E. & R. Garrould's, 150 to 162, Edgware Road, W. Here every consideration is given to their convenience. Everything in the way of personal equipment that they may desire, and much more besides is conveniently brought together in the Nurses' Saloon. Here also in a quiet corner they can write letters, consult reference books, and meet friends. It is small wonder, then, that at whatever time one visits this West End emporium one finds nurses congregated there and the department devoted to their needs one of the busiest in the establishment.

Just now, with spring upon us, is the time for the renewal of uniforms, and Messrs. Garrould are showing a wide and attractive selection. Also nurses who are out of town can obtain patterns and measurement forms post free.

The firm also makes a speciality of "St. Mary's" Ward Shoe, soft and pliable, at the moderate price of 13s. 6d.

MESSRS. THOMAS WALLIS & CO., LTD.

Many nurses find the establishment of Messrs. Thomas Wallis & Co., at Holborn Circus, London E.C. 1, a convenient centre for shopping, and purchase uniforms and outfits there. The firm studies economy and is glad to quote prices on application. They have also had extensive experience as Hospital contractors, and are prepared to supply hospital furnishings of all kinds.

THERMOGENE.

Thermogene Curative Wadding (Thermogene Bureau, K31, Hayward's Heath, Sussex) is much in demand at the present time. It can be obtained of all chemists and drug stores, and is used in Naval and Military and Red Cross Hospitals.

MESSRS. BURROUGHS WELLCOME & CO.

It must always be placed to the credit of Messrs. Burroughs, Wellcome & Co., Snow Hill Buildings, London, E.C., that nearly twenty years ago they pioneered the attack on the German fine chemical monopolies. They have done notable things during the war, but the commercial production of Pilocarpine in 1900, Atropine and Eserine in 1901 and Homatropine in 1905 must not be forgotten in the glamour of war-time achievement. Kharsiran and Neokharsivan are products that mark a signal triumph for British skill and research; and in the official report of the Royal Commission on Venereal Diseases, 1916, these specialities of Messrs. Burroughs & Wellcome were described as producing excellent results.

MESSRS. A. & E. BRAID & CO., LTD.

Messrs. Braid, of 30, Gower Place, W.C. 1, make a very special feature of the "Sterling" Rubber Gloves, for which they are sole agents.

These gloves can be relied upon as of exceptional value.

INGRAM'S SEAMLESS ENEMA SYRINGES.

When selecting an enema syringe do not forget that the Seamless Syringes supplied by Messrs. J. G. Ingram & Son, Ltd., Hackney Wick, are obtainable of all chemists, and that they are of high grade quality.

NUJOL.

Nujol, which is an American product supplied in this country by the Anglo-American Oil Co., Ltd., 36, Queen Anne's Gate, Westminster, S.W. 1, is a valuable preparation, the effect of which is to train the bowels to functionate naturally. It acts mechanically, not medicinally.

FAWCETT'S BARLEY.

Fawcett's Natural Process Barley (Fawcett's Barley Food Specialists, Castleford, Yorks.) is a very valuable food in the dietary both of children and invalids. It is also a reliable means for diluting milk, and should find a place in the store cupboards of all hospitals and private houses.

BENGER'S FOOD, LTD.

Benger's Food (Otter Works, Manchester) is a very valuable farinaceous food, and as it contains natural digestive principles, is taken with benefit by persons of enfeebled digestion. Invalids and old people who take Benger's Food before settling down for the night frequently find that refreshing sleep follows.

PROFESSIONAL LITERATURE.

Both nurses and midwives will find in the professional literature published by Messrs. Charles Griffin & Co., Ltd., Exeter Street, Strand, W.C. 2, a selection which cannot fail to be of use to them in the course of their work. A most popular book with nurses is "A Manual of Nursing" (Medical and Surgical) by Dr. Laurence Humphry, now in its thirty-eighth edition, while, in view of the interest at present being taken in infant welfare, Dr. J. B. Hellier's "Infancy and Infant Rearing," Dr. Westland's book on "The Child (a Medical Guide to its Care and Management)" and other kindred books will be of great use to students of this subject.

COMING EVENTS.

April 26th.—National Union of Trained Nurses' Annual Council Meeting, 46, Marsham Street, Westminster, S.W. 2.30 p.m.

April 28th to May 2nd.—Ninth Annual Nursing and Midwifery Conference and Exhibition, St. Andrew's Hall, Newman Street, Oxford Street, W. From noon to 9 p.m. each day.
