

Violize the Milk

VIOLIZED Milk is made by adding a teaspoonful of Virol to half a pint of warm milk. It is a wonderful tonic food for tired nurses, and a great restorative after mental and bodily fatigue.

It is an ideal diet for expectant and nursing mothers.

The Virol, by its remarkable building up properties, not only increases the nutrient value of the milk, it also makes the milk easily digestible.

The remarkable influence that Virol exerts on growing tissues has given the preparation a world-wide reputation for infants and young children.

Nothing can equal the value of Virolized Milk for children of school age, who require building up against the cold and chill of winter; or after influenza and other bacterial infection.

As Virol is known to contain the Vitamines essential to health, the milk should be below boiling point when the Virol is added. The activity of the Vitamines is reduced or destroyed by excessive heat.

**Virol is used in more than 2,500
Hospitals and Infant Clinics.**

VIROL

In Jars: 1/3, 2/-, & 3/9.

Virol Ltd., 148-166, Old Street, London, E.C.1.
