JULY 9, 1891.]

existence at the close of the fortieth year is  $\pounds$  33,033. The surplus funds (which are invested in readily convertible securities) are sufficient to pay the depositors 114 per cent. on the amount of their deposits. The new accounts opened during the year were 10,051, and, there are, altogether, 60,045 shareholders and depositors on the books. Since its establishment, the society has returned to the shareholders and depositors more than one hundred millions (£117,071,323), the whole amount having been repaid upon demand. S. G.

## The "Aursing Record" POST-CARD EXAMINATIONS. No. 23.

A Book or Books of the value of Five Shillings will be awarded to the best answer to the following question, addressed, "Nursing Record Post-Card Competition," St. Dunstan's House, Fetter Lane, E.C. All answers to this question to reach us not later than the morning of Satur-day, July 11th, 1891 :--

"Describe the method of Administering a Cold Pack.

(a) The answer must be written (neatness and distinctness count to credit) in ink, on a *thick* post-card, with the full name and address of the candidate at the *top*. The successful candidate's answer will be written in *Gastinut*.

A disease that has hitherto baffled the skill of the most reminent physicians, who have sought in vain to cure or prevent its annual return.

WRITE FOR CIRCULAR & TESTIMONIALS.

One CARBOLIC SMOKE BALL will last a family several summers, making it the cheapest remedy in the world at the price-10s. post free.

The CARBOLIC SMOKE BALL can be refilled, when empty, at a cost of 5s. post free.

CARBOLIC SMOKE BALL CO., 27, Princes 3: Hanover Square, W.

LETTERS TO THE EDITOR. (Notes, Querles, &c.)

Whilst cordially inviting communications upon all subjects for these columns, we wish it to be distinctly understood that we do not IN ANY WAY hold ourselves responsible for the opinions expressed by our correspondents.

We shall be happy to answer, as far as we can, all questions submitted to us.

THE VICTORY OF THE BADGE. To the Editor of "The Nursing Record."

Dear Sir,-In common with those of my sister Members who share my views, I am pleased that the Badge question has been settled in the affirmative. There are two persons who, at a time like this, should not be overlooked—the Mem-ber who *first* suggested a badge (whose name I regret I cannot recall), and Mr. Editor, to whose courtesy, patience and impartiality our thanks are due for allowing us the use of his pages to talk the matter over (on paper) amongst ourselves.

We have got to the end of our desires, but we are only at the beginning of the new obligation it entails; let every recipient remember that it is not the Badge that gives dis-tinction to the holder, but the holder to the Badge, if she hold it worthily. It is not a trinket, but an emblem, an outward it worthily. It is not a *trinket*, but an *emblem*, an outward sign of fidelity to those great principles our Association was established to advocate and advance.

One argument brought against the Badge was, the possible unworthiness of the holder. To argue against a thing from its abuse is perhaps of all arguments the least convincing, as

THE LANCET, in its issue of the 29th Nov. 1890, reports :--

\*\* SALVINE DENTIFRICE' is a delicately-scented paste, which ex-hibits an alkaline reaction to test paper. It is perfectly free from injurious elements. From its composition it is evidently ANT-ACID, ANTRINGENT, and ANTI-PARASITIC. 'SALVINE' is contained in collapsible tubes, the use of which offers obvious advantages."

Dr. REDWOOD, F.I.C., F.C.S., Professor of Chemistry and Pharmacy to the Pharma ceutical Society of Great Britain, reports --

"Having examined 'SALVINE,' I find it to be composed of high-class ingredients, eminently useful for the cleansing of the Teeth. It has a slightly alkaline reaction, and is of an antiseptic character, doubtless tending to the preservation of the Teeth. I consider it carefully prepared, agreeably perfumed, and entirely free from anything of an injurious nature."

Messrs. STANGER & BLOUNT, F.C.S., The well-known Analysts and Assayers to H.M. Government, report :-

"We have carefully examined 'SALVINE.' and are of opinion that it is a Dentifice of well-devised composition. We have in our analytical experience never met with a more rationally prepared composition."

Of all Chemists, 1/-, 1/6, 2/6; or direct from Depôt-3. OXFORD STREET, LONDON, W.
