 Nurse Tindale.

NURSING ECHOES.

. All communications must be duly authenticated with name and address, not for publication, but as evidence of good faith.

I HAVE received the Sixth Annual Report of the Hamilton Association for Trained Male Nurses.

I regret that the work has been conducted at a heavy loss, amounting to between three and four hundred pounds. The necessary expenses have only been met by reducing the working balance, as may be seen by a glance at the balance-sheet. The Committee still have in reserve two hundred pounds, placed on deposit with their bankers, but they are very unwilling to trench upon this deposit, unless it becomes absolutely necessary. They trust that

the access of fresh subscribers in sufficient numbers may obviate this necessity. I sincerely hope that some new subscribers may speedily be obtained to alter the condition of affairs, as this is a most deserving Institution.

 THE Seventh Annual Report of the East-end Mothers' Home has also reached me. Funds are required very urgently, and the following account of work done, presents, I think, every reasonable explanation: "The number of patients registered for admission during the financial year ending April 30, 1891, was 169; of these, 116 became in-patients; 27 were attended at their own abodes at a time when the 'Home' was closed for a short period; 2 were struck off the register for failing to comply with rules; 24 were still on the register on April 30. Since the opening of the 'Home' on December 6, 1884, 887 have been registered for admission, and 721 have been under treatment. Six Nurses have, during the financial year, been trained as Monthly Nurses."

* * *
 AT a recent meeting of the St. Saviour's Board of Guardians, Dr. Pain referred to the fact that more Nurses had resigned, and moved that the Board should endeavour to find out why so many Nurses had resigned. After some discussion Dr. Pain was induced to withdraw his motion. It was pointed out that the Medical Officer had resigned, a new Matron had only just been appointed, the Steward was called upon to resign, the Steward's Clerk had resigned, Nurses were resigning, and that, with so many changes, it was not wise to complicate matters. Dr. Pain, therefore, holds over his inquiry respecting the resignation of the Nurses for the present. I shall be greatly interested to learn the result.

 THE *Daily News* reminds me that "Signor Verdi's Hospital near Fiorenzuola, cost in building £8,000. He added an endowment of £40,000. He is now building in Milan a Hospital for poor old artists, which will cost him £20,000. The architect is Camillo Boito. Verdi will endow this Hospital with a capital of £80,000. The number of aged artists admitted will be 130; they will be taken from every province in Italy, and will be most comfortably boarded and lodged. A Genoese contemporary, in recording these benefactions, records also Verdi's dislike of his charitable deeds being published. 'I don't want to be reduced to end my days in a Hospital!' he said. 'If I could manage that no one took any notice of the little good I attempt to do, I should live
