

Bovril keeps up Strength

Have you tried Invalid Bovril for your patients? It has an exceptionally high proteid value and is prepared without seasoning, so that invalids "take to it" readily.

Easily assimilated by the most delicate digestion, Invalid Bovril is recognised by the Faculty as invaluable both in illness and convalescence.

INVALID BOVRIL

Obtainable from all Chemists

Made in England

For Infant Feeding

Horlick's Malted Milk — the original — supplies all the elements of nutrition in Cereals in Milk in proper proportions and with the amylolytic conversion of starch, thus fulfilling the physiological requirements of Infants, and constituting the characteristics of a proper diet in Infancy. It is dependable in all climates, free from pathogenic organisms, and affords a solution to the pure milk problem, as well as the prevention of those diseases often induced by amylaceous foods. Complete in itself, and ready in a moment by briskly stirring in water only.

To secure the original, specify "Horlick's" when ordering.

Samples will be forwarded free and postage prepaid to Members of the Nursing Profession on application to

HORLICK'S MALTED MILK CO., SLOUGH, BUCKS.
