

Warm Weather

How can Baby dream wonderful happy dreams and slumber restfully when warm weather is making his delicate skin damp and ticklish? Only if Nurse cools him and smooths out the frowns of his plump little body with a frequent dusting of Johnson's Baby Powder.

It is a powder of purest talc, ground and re-ground until it is immeasurably fine—with a little boracic added to keep Baby safe and the faintest trace of perfume: all untouched by hand.

Johnson's BABY POWDER

Borated. Calcium

A Product of JOHNSON & Co. Slough

WINCARNIS in general practice

Many nurses have found that in anæmic and debilitated conditions, during convalescence, and in post-operation cases, Wincarnis stimulates appetite, promotes digestion, and effects marked improvement in nutrition.

Wincarnis is made from imported red wines of the finest quality, guaranteed free from anti-ferment or other deleterious matter, to which is added pure beef and malt extracts, and a solution of manganese hypophosphites.

WINCARNIS

Members of the nursing profession are invited to write for booklet: "Composition and Therapeutic Properties of Wincarnis" to Coleman & Co. Ltd., Wincarnis Works, Norwich.
