

carried inside an envelope or pocket-book; that they will keep good any length of time in any climate; and that they are safe, being strictly a composition of mustard. Having for many years used and tested them under almost every possible circumstance, we can bear ample testimony to their merits.

"FURFELT" CHEST PROTECTOR (manufactured by Messrs. Solport Bros., 66, Shaftesbury Street, New North Road).—Our attention has been drawn to this excellent invention. The composition of the material for this article, we believe

to be perfectly unique, in fact it is composed of a mixture of fur and woollen felt, and has already been scientifically and experimentally proved by eminent professors, that fur possesses the lowest conducting power of heat of any substance yet examined. The incorporation of the wool with the fur results in producing a very substantial fabric, the advantages of which it is easy to imagine. It is very pliant to the touch,

beautifully soft and smooth, and, being absolutely free from dye, it appears to be utterly impossible for this to irritate the skin in any way. Besides this it has the advantage of being exceedingly porous, while the fur being part of its composition, it prevents the wool clogging, as otherwise it is apt to do. The proprietors claim for this protector, and very justly too, that if worn after an attack of influenza it will most probably prevent the disastrous after-effects often experienced by its victims. We cannot speak too highly of this "Furfelt" Chest Protector, and for those requiring to purchase such articles we would advise an inspection of the stock of Messrs. Solport Bros.

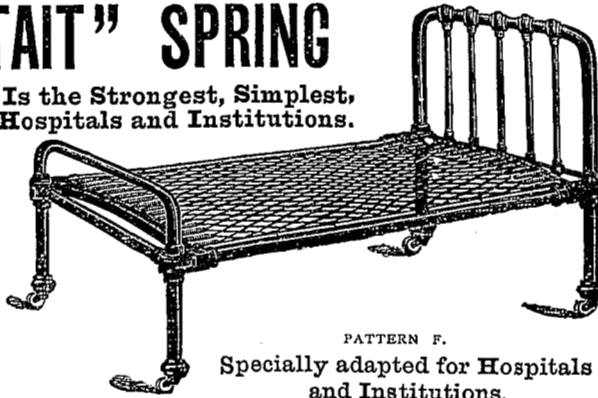

CHOCOLAT MENIER (47, Southwark Street, London, S.E.).—Fifty tons of this chocolate is turned out of the factory every day, which is in itself quite sufficient testimony as to its excellence and popularity. As chocolate enters largely into invalids' dietary, in some form or other, whether liquid or solid (as chocolate in the cup, or in the shape of blanc-mange, pudding, &c.), it is very essential that it be absolutely pure, and this Chocolat Menier is, beyond doubt or dispute.

"LAWSON TAIT" SPRING

Arched Head & Foot. Is the Strongest, Simplest, and most suitable for Hospitals and Institutions.

BEDSTEAD.

AFTER SIX YEARS' WEAR

"7, The Crescent, Birmingham.
June 25th, 1888.

"Dear Sirs,—The Bedsteads you constructed for me with 'Dominion Wire Spring Mattresses' are by far the very best I have seen. They have now been in use for over SIX YEARS, and have not given way in the least; the Springs have never broken, NOR DO THEY GET RUSTED. They are in every way satisfactory.

"Yours truly,
"LAWSON TAIT, F.R.C.S."

THE WAY WE HELP NURSES.

We now make it a rule to supply Nurses with our Preparations at the same rate as to the trade, which gives them a discount on our goods of over **25 per cent.** Nurses must write direct and enclose their card, and we will send them samples gratis, and a Special Price List to Nurses.

We beg to call special attention to our

HARTMANN'S ACCOUCHEMENT SHEETS & HARTMANN'S WOOD WOOL DIAPERS,

which are rapidly coming into use everywhere. They are a great boon to Patient, Nurse, and Physician in attendance. They are antiseptic, clean and comfortable, and diminish the risk of puerperal fever.

The fact that our Preparations are in use in all the Leading Hospitals in the United Kingdom is the best proof of their value.

For **FREE SAMPLES** and **REDUCED PRICE LIST TO NURSES** address
