

have several novelties in both cakes and biscuits for the present season.

Messrs. Van Houten and Co., the cocoa manufacturers, had a very nice stand and were doing some practical advertising of their goods by giving samples away to the visitors. The merits of their cocoa are too well known to need any comment from ourselves.

Messrs. Rowntree and Co., of York, had also in this same room a long and handsome stand upon which the very large variety of goods made by them was most tastefully and temptingly displayed. They were even more practical than their cocoa competitors, for, under the care of a watchful lady, cups of both chocolate and cocoa, made in a delicious manner, were supplied, thus enabling the public practically to "taste and try" before purchasing. Messrs. Rowntree by no means confine their attention to the production of chocolate and cocoa, for they have such a stock of the better kinds of confectionery as even many a French house might envy, their chocolate cream fondants containing, instead of the ordinary cream, a delicious raspberry or strawberry cream, or some other fruit, as may be preferred by the purchaser; and not alone in creams does this house excel, for fruit lozenges of almost every kind of fruit ordinarily known to

the English market, are made, embracing among the ordinary kinds such fruits as currants (black and red), raspberries, strawberries, damsons; greengage, apricot, &c., &c.; and what will, perhaps, be of more interest to our Nursing readers, a special malt lozenge is prepared, in which, although held in a state of suspense, the malt extract is as easily distinguishable as in its ordinary liquid state, and yet the lozenge is crystallised so far as its exterior is concerned, and could even be carried loose in the pocket without impairing its vitality. To those of our Nursing friends who may either have to take or administer maltine, this will doubtless prove a boon. We should have mentioned, also, that a violet fondant is kept, and crystallised violet of excellent quality, but far cheaper than any we have hitherto met, are kept also. A new exhibit, which we have not seen before at similar exhibitions, was the Greek-preserved goods of all kinds, from green oranges to loucomes, bonbons, and other luxuries so dear to the heart of the average Greek, shown by M. Ricos, of Thornton Heath.

Messrs. C. H. Senn, of Vauxhall Bridge Road, were showing a full line of high-class table delicacies, comestibles, &c., which are on a par with the well-known "Senn's Hygienic Caviare." Messrs. Gunn's Food Manufacturing Company,

TEETH:	TEETH!!	TEETH!!!
Teeth extracted by the ELECTRIC DENTAL CHAIR, absolutely without pain, by the Inventor, who is a registered and qualified Surgeon-Dentist.		
Surgeon's Opinion.—February 5th, 1892.—Dear Mr. Atwood, I am delighted and astonished at the rapid way in which you extracted my Molar Tooth by Electricity in your Electro-Dental Chair, without pain. Can recommend to all who dread the pain of extraction.		
GEO. HUNSTONE, M.R.C.S. and L.S.A., Surgeon, 9, Oxford St., W.		
J. J. ATWOOD, L.D.S., R.C.S., Qualified & Registered Surgeon-Dentist,		Scientific Dentistry in all Branches.
Inventor of the Improved Electric Dental Chair.		(Corner of Princes Street.)
Specialist: 242, OXFORD STREET, OXFORD CIRCUS, W.		Charges on Monday and Thursday, 5s.
SURGERIES LIGHTED by ELECTRICITY.		
ARTIFICIAL SETS OF TEETH FROM £1.		
SINGLE TOOTH, 2/6		
EXTRACTED (Ordinary), 2/-; ELECTRICITY, 5/-, without pain.		
STOPPING, 2/6		
Special Terms to Nurses and Hospital Attendants. Kindly mention this Paper. Hours, 10 to 7.		

STANDARD MALT EXTRACT

Plain and with Cod Liver Oil.

THE attention of the Nursing profession is specially invited to these preparations, which are now growing more and more in favour amongst medical men both in London and the provinces. They are extensively used by the leading Chest and other Hospitals. A trial will at once prove that they are far more powerful in results than any other known Malt Extract preparations, as the Standard Malt Extract contains many times more **Diastase**—diastase being acknowledged by all competent authorities to be the most important constituent of Malt Extract. This Extract also contains "Maltose," which is rich in flesh-forming and bone-producing properties; and the

soluble phosphates of lime, soda, and potash, naturally present in the grain, serve as a valuable tonic to the nervous system. A Sample will be sent to any Nurse or Doctor on receipt of a post-card, and special prices quoted.

The STANDARD MALT EXTRACT Co., 23, Billiter Street, London, E.C.
