

Inventions, Preparations, &c.

"SANITAS" PREPARATIONS (The Sanitas Co., Ltd., Bethnal Green, N.E.)—These well-known manufactures have become household words. Being thoroughly reliable and non-poisonous, they are particularly adapted for use as deodorants and disinfectants, and valuable both in health and disease; in the former instance as a pleasant and agreeable adjunct to cleanliness, and in the latter as an essential in the sick room. Many people, until they have tried "Sanitas," vainly imagine that nothing can be effective as a deodorant or disinfectant in the prevention of the spreading of infectious diseases unless it gives off a perfectly vile-smell. The Sanitas Company not only has proved that this is not requisite, but has gone so far as to practically demonstrate that stinking compounds are altogether unnecessary and uncalled for. It has produced an article which kills germs without nauseating human beings. Among the many and varied preparations, etc., which this Company manufactures under the personal supervision of the inventor, a well-known analytical chemist, are:— "Sanitas" Disinfecting Fluid, which can be sprayed about rooms and over linen and clothing; "Sanitas" Disinfecting Soaps, to be used for all washing and scrubbing purposes; "Sanitas" Dis-

infecting Powder, for use in earth closets, for sprinkling over drains, contents of ash bins, and offensive accumulations generally; "Sanitas" Disinfectors, which should be fixed in every water closet, hospital ward, and sick room; "Sanitas" Fumigators, employed in fumigating sick rooms and preventing the spread of infection; "Sanitas" Inhalers, for the prevention and treatment of lung, throat, and nasal diseases. "Sanitas" does not stain and is non-poisonous, so that it may be safely used by Nurses at any time, and under any conditions necessitating the use of a disinfectant or deodorant. From personal experience and examination we can vouch for the excellence and stability of all the preparations which we have mentioned.

Fresh Pages.

Simple Recipes for Sickroom Cookery. By MARIAN BUCK. (Messrs. Raithby, Lawrence & Co., 1, Imperial Buildings, Ludgate Circus, E.C.) Price 2d.

County Council Cookery. (Same Authoress and Publishers.) Price 4d. The scope of the first of these two booklets, which contains some three dozen recipes, is sufficiently explained by its title, and its existence justified by its having passed into a second edition. Many a beginner would find it useful. The second is addressed to those who are engaged in lecturing to classes under the Technical Education Act. The authoress gives an outline of suggested lectures, both for
