THE UNEMPLOYED IN EAST LONDON.—At a time when much thought is being given to this matter, a practical suggestion may be of service. Last year more than £300,000 worth of foreign matches were purchased by inconsiderate consumers in this country, to the great injury of our own working people. So true is it that "Evil is wrought by want of thought as well as want of heart." If all consumers would purchase Bryant & May's Matches, that firm would be enabled to pay £1,000 a week more in wages.

Dr. F. ARNOLD LEES,
M.D., M.R.C.S. Eng.,
L.R.C.P. Lon., says:

"Young children grow very fond of the jelly, spread on bread and butter, and grow heavier and stouter when using it in a ratio out of all proportion to the weight of the jelly eaten, showing that it not only nourishes but assists assimilation of other food."

HOBLYN'S DICTIONARY

OF TERMS USED IN MEDICINE AND THE COLLATERAL SCIENCES,

REVISED AND ENLARGED.

By J. A. P. PRICE, B.A., M.D. Oxon.,

Assistant Surgeon to the Royal Berkshire Hospital; late Physician to the Royal Hospital for Children and Women.

The changes in the present edition are mainly those of addition, and the Editor hopes that the selection of several new words and phrases, more particularly those relating to bacteriology, will render the work even more useful than it has been in the past. The Greek *κ* has been invariably rendered by the letter "c," except where general usage has accepted the letter "k," as, for instance, in *kinetic keratitis*, &c.; to paragraphs in which occur the names of celebrated physicians, surgeons, anatomists, &c., are appended the periods during which they lived.—*Preface.*
