THE BRITISH JOURNAL OF NURSING

WITH WHICH IS INCORPORATED

THE NURSING RECORD

No. 2189. Vol. 99.

JANUARY, 1951.

PRICE SEVENPENCE.

ASPIRIN is an acidic substance, sparingly soluble

DISPRIN is neutral, stable, soluble—and palatable

...ferring calcium aspirin to aspirin lie
that it is a neutral, soluble and bland
whereas aspirin is acidic, sparingly soluble
as a gastric irritant. But calcium aspirin has
of its own—chemical instability; and in con-
sequence attempts to manufacture it in the form of tablets

that could be depended upon
to remain free of nauseous
breakdown products, under
reasonable conditions of storage,
have hitherto met with little
success. These difficulties have
now been overcome. 'Disprin,' a

stable, tablet preparation, readily
dissolves to yield a substantially
neutral and palatable solution
of calcium aspirin that can be
prescribed in all conditions in
which acetylsalicylate administra-
tion is indicated.

Extended clinical trials show that
Disprin in massive dosage, even
over long periods, can be tolerated
without the development of gastric
or systemic disturbances except in
cases of extreme hypersensitivity.

DISPRIN REGD. *Neutral, stable, soluble
palatable calcium aspirin*

On prescription Disprin is free of Purchase Tax.
Clinical sample and literature supplied on application.
